**CRETORS OFFERS HIGH SPEED ICE SHAVING MACHINES FOR  
AMUSEMENT INDUSTRY**

*Ideal machines for shaving ice for sno-cones*

C. Cretors and Company, the leading designer and manufacturer of food processing and concession equipment for over 120 years, offers the Echols line of high speed ice shavers. Ideal for the amusement and entertainment industries, these innovative machines are an attractive and highly efficient primary element in the making of sno-cones.

Cretors' high speed ice shavers, which fit securely on display cases or a counter stand, feature heavy duty cast aluminum construction for years of reliable use. The machines can shave up to 500 lbs. of ice per hours, and for operator convenience, the shaver can use ice in sizes ranging from small cubes to 4.5" chunks. The ice machines are available in electric, gas, or battery power.

The leak-proof display case, with Plexiglas front and sides, provides customers and employees with a clear view of the ice, while a slide-down door allows easy cabinet access. Optional internal fluorescent lighting contributes to attractive merchandising.

**About C. Cretors and Company**

Established in 1885, C. Cretors and Company is the leading designer and manufacturer of food processing and concession equipment providing a complete range of innovative foodservice solutions to companies around the world. A renowned industry innovator, in 1885 Cretors introduced the first patented steam driven popcorn machine that popped corn in oil. Since 1967, Cretors' Food Processing Division has offered a patented continuous production line featuring a hot air fluidized bed oven for high-volume popcorn production.

Over the company's long and storied history, its Foodservice Division offerings have expanded to include machines that produce and/or dispense cotton candy, nachos, caramel corn, and hot dogs, topping and dispensing equipment as well as warming and display cabinets. Today, Cretors continues to reinvest in research and development to

ensure constant improvements in everything from equipment manufacture to customer responsiveness to distributor network communications.
