CRETORS OFFERS 8 oz. POPPERS FOR SMALL AND MID-SIZED VENUES

Customizable Poppers Deliver Quality, Convenience and Easy Cleaning

C. Cretors and Company, the leading designer and manufacturer of food processing and concession equipment for 124 years, offers the 8 oz. T-2000 small Popper for small to mid-sized venues. Ideal for nightclubs, casinos, bars, convenience stores and cruise ships, the T-2000 pops 160 one-ounce servings per hour, and is available with a custom, modern or antique design to match any venue.

Each popcorn machine features a corrosion-resistant stainless steel or nickel plated all-steel kettle. These plug-in, clean-in-place kettles are designed for easy cleaning and quick kettle change-out, meeting the highest sanitation standards. A direct drive agitator provides longer motor life with no exposed gears to replace. For ease of use, a cycling pilot light illuminates when the kettle is ready to begin production, and an eye-level lighted rocker switch indicates operation. The machine is available in either a standard or antique design. The Antique popper includes a hand painted scroll.

A variety of additional features are also available to customize your small popper including a "One-Pop" button that, with a single push, heats the kettle, pops the corn and shuts off after one popping cycle. The Cretors exclusive safety feature eliminates the potential for the kettle to overheat. The One-Pop option can also be equipped with a counter for recording the number of popping cycles. Other options include a stainless steel kettle, and a salt/sweet switch which allows the user to change between "salted" and "sweet" corn production. Switch out the painted top for the optional stainless steel top to give the machine a sleeker look. Matching wagon bases are available for increased versatility and mobility. Custom painting is also available to complement home décor, school colors and businesses among many others.

About C. Cretors and Company

Established in 1885, C. Cretors and Company is the leading designer and manufacturer of food processing and concession equipment providing a complete range of innovative food service solutions to companies around the world. Cretors is a renowned industry

innovator, who in 1893 introduced the first patented steam driven popcorn machine that

MORE

popped corn in oil. In 1967, Cretors' Food Processing Division introduced a patented continuous production line featuring a hot air fluidized bed oven for high-volume popcorn production, ranging from 80 to 5,000 lbs. per hour.

Over the company's long and storied history, its Foodservice Division offerings have expanded to include machines that produce and/or dispense cotton candy, nachos, caramel corn, and hot dogs, topping and dispensing equipment as well as warming and display cabinets. Today, Cretors continues to reinvest in research and development to ensure constant improvements in everything from equipment manufacture to customer responsiveness to distributor network communications.
