CRETORS

means Craftsmanship

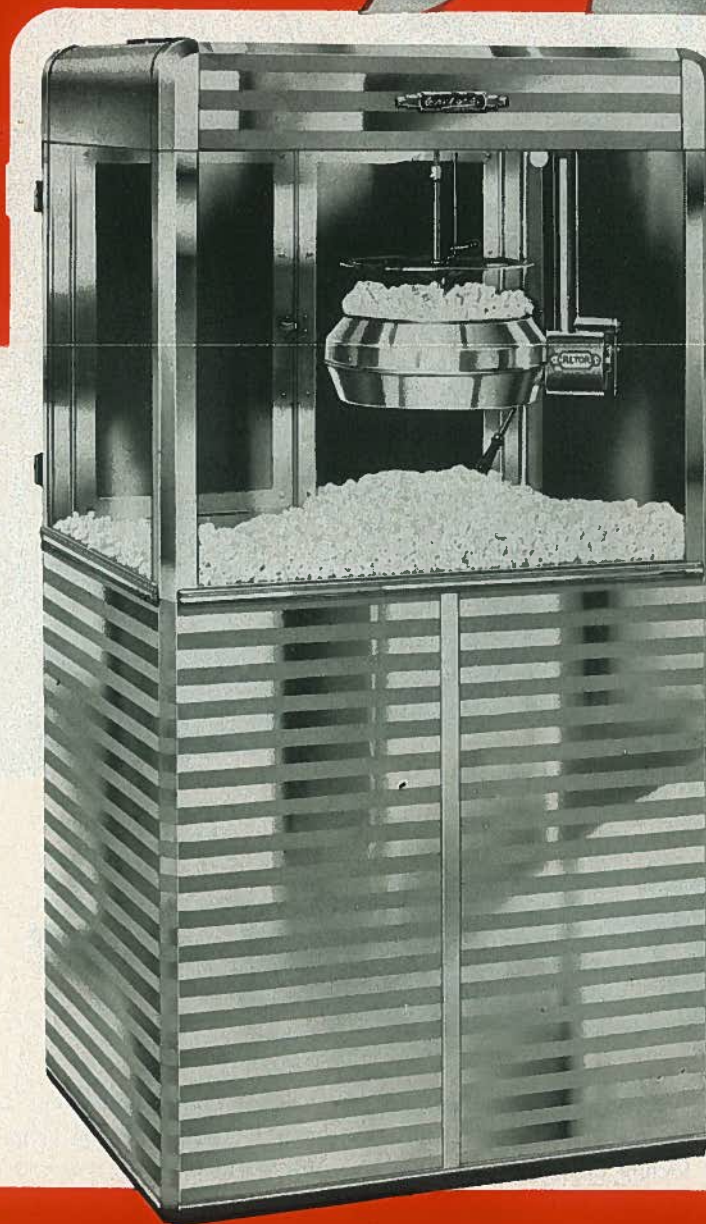

Hollywood Model 48

Here is America's most beautiful corn-popping machine. The sturdy, lifetime welded steel frame and sidewalls are finished in satin-stripped stainless steel. The popper case bottom is also stainless steel. All parts are easily accessible for quick cleaning. No flexing electric supply cable to popper pan—assuring trouble-free operation!

Capacity: One pound raw corn per popping.

Size: 36½"x30¼"x72".

- Patented popper pan construction insures greater popping volume.
- Double heated popper case.
- Thermostatic control on popper pan.
- Filtered exhaust system.*
- Metered seasoning pump.*
- Exclusive automatic cover lift increases display and "action-appeal" while corn is popping.
- Replaceable popper heating elements.
- Concealed mechanism.

*Optional at extra cost.

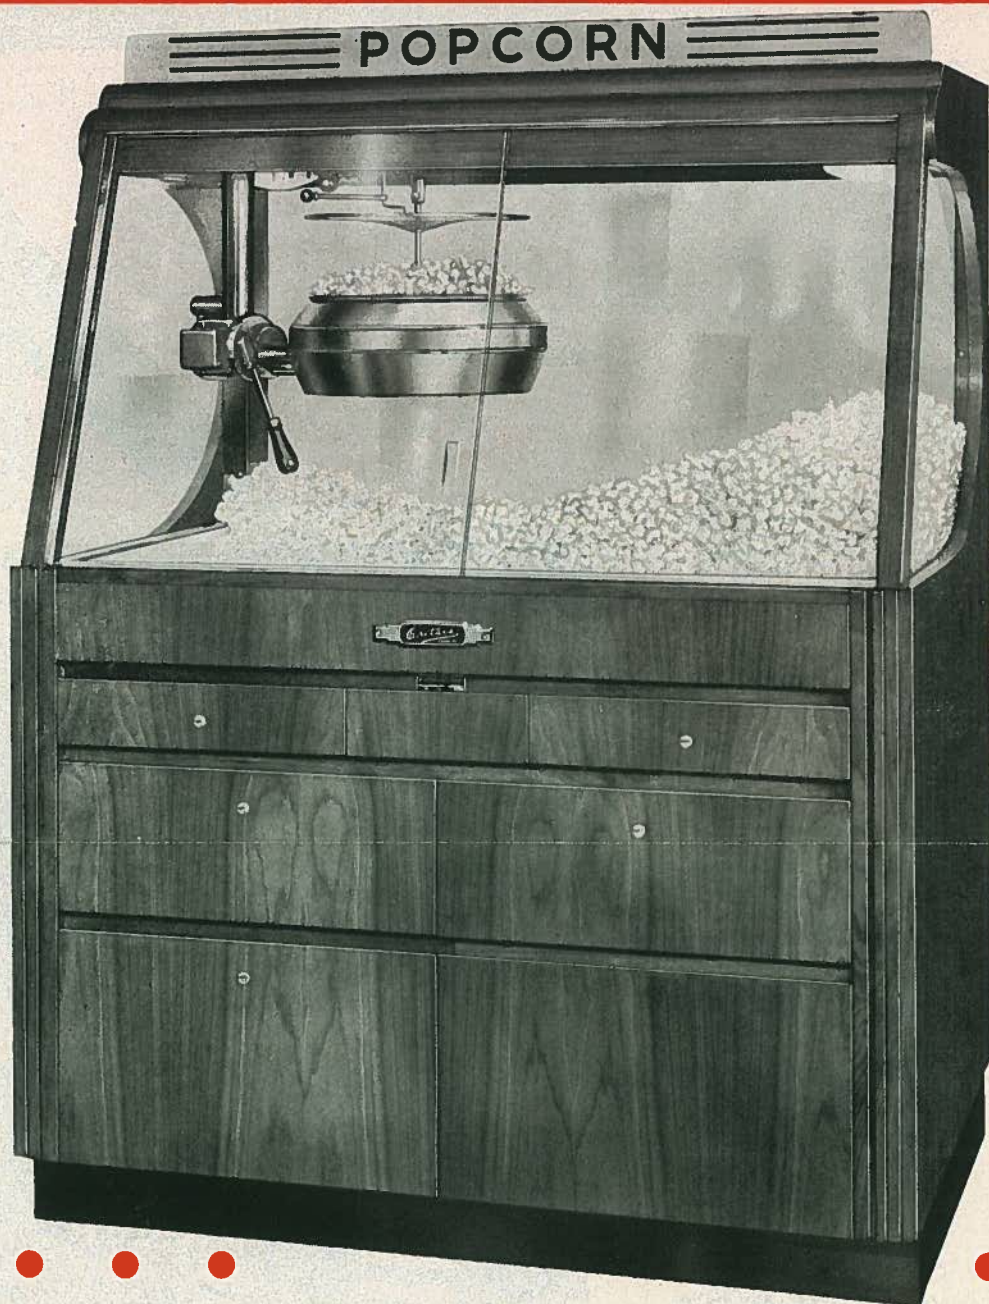

"You'll Always Be Glad You Bought A Cretors"

CRETORS CRAFTSMAN

Super 60 Model

This modern, improved Popcorn machine is the finest on the market today! It is custom-built, in a genuine, natural walnut finish that harmonizes with any location. A double heating system, both top and bottom, keeps the supply of reserve popped corn crisp and tasty, while large, roomier, popper case construction provides more heated storage space for popped corn. Dimensions: 48"x28"x63". Capacity: One pound raw corn per popping.

- Streamlined Beauty.
- No flexing electric cable to popper pan.
- Filtered exhaust system.
- Removable popping elements.
- Speedy, efficient front operation.
- Plus all the features to be found in the Hollywood Model 48.

is still tops!

Even back in Grandma's day the "Cretors" bright red, green and gold popcorn wagon was an eye-attracting "customer-getter." Today, with 64 years experience in the manufacture of corn-popping machines for world-wide use, you are assured of the best more than ever before! Cretors modern, improved corn-popping machines cover every phase and need of popcorn merchandising. Combining eye-attracting beauty with efficient mechanisms, they assure economical, speedy operation and large profits.

Giant Model 44

The new Giant Display Model 44 is a fast, large volume popper, for use in Drive-In Theatre Concessions. Its large, eye-focusing display case is provided with heating elements to keep the popped corn appetizingly warm. Comes equipped with the improved Giant Model 41 popping unit and Seasoning Pump . . . also two deep easy-slide drawers, one for raw corn, the other for waste corn. Completely trimmed in easy-to-clean stainless steel. Heated by gas. Electric popping unit available.

Size: 72" x 30" x 56" high. Capacity: 2 lbs. per popping.

Giant Model 41

This auxiliary popcorn machine is a fast, efficient, popper that pops corn direct in the seasoning and salt. Pops 2 lbs. of raw corn each popping, giving about 13 bushels of popped corn per hour. Patented cover construction relieves popping corn of pressure, insuring maximum popping volume. Available in twin floor Model 42 complete with stand.
