

CRETORS POPCORN MACHINES

SINCE 1885

styled for sales / engineered for profits

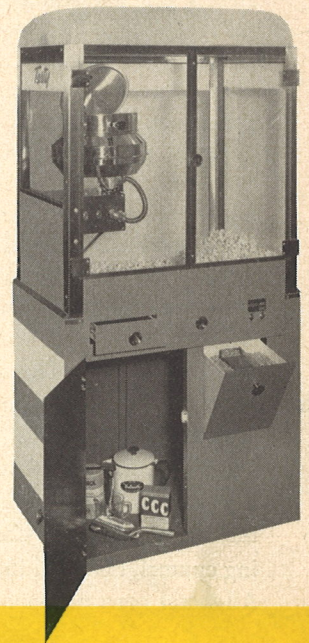

BASIC SPECIFICATIONS: Dimensions: 65½" high x 31" wide x 20⅝" front to back. 110V AC. Total wattage: 1,750. Shipping weight: 245 lbs.

CATALOG NO. H12E

The "Holiday"

Rear View

Showing cash drawer, tilt-out corn bin, and roomy compartment for storing oil, seasoning and supplies.

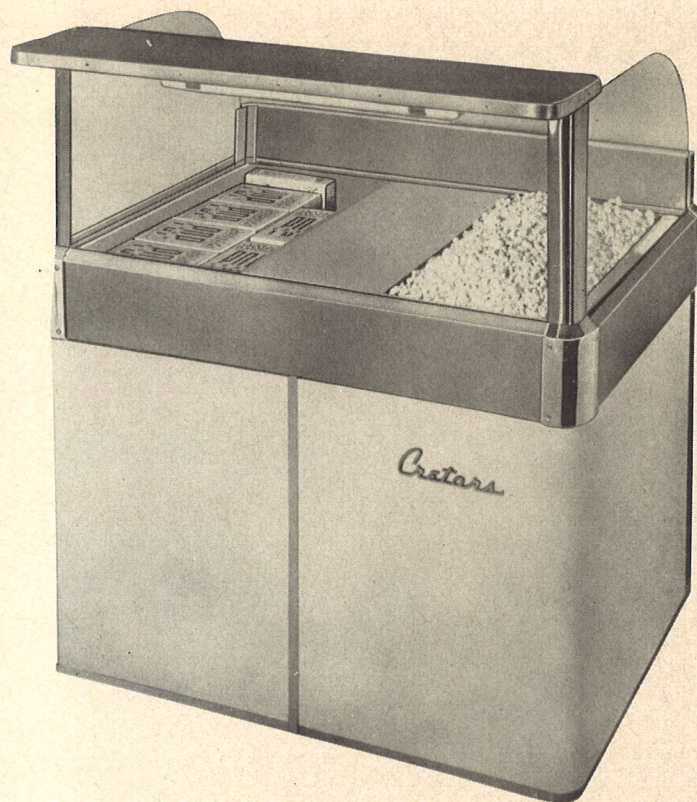

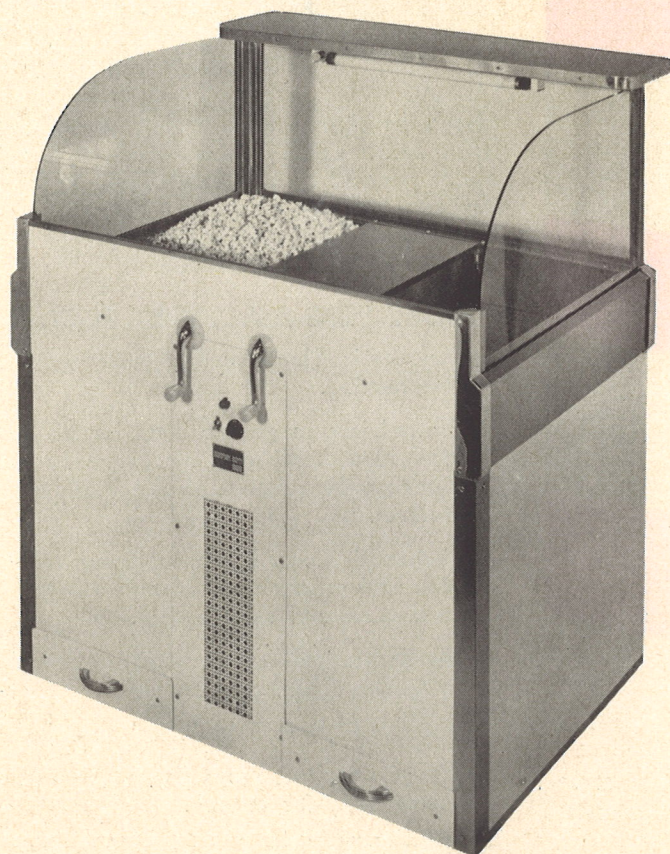

Here's the biggest money-maker in the medium-price field! CRETORS' exclusive design Steel Kettle pops 12 oz. of raw corn per charge and can earn \$30.00 an hour . . . New cabinet is a traffic stopper. . . CRETORS quality design, engineering, and construction.

MORE "BIG-MACHINE" FEATURES

- ★ Automatic Thermostat prevents kettle from overheating.
- ★ Extra-heavy-gauge steel kettle bottom, lighter-gauge steel kettle walls concentrate heat *under* the corn for greatest efficiency and popping volume.
- ★ Automatic Cover Lift lets popping corn overflow into popper case for more volume, more animation and sales appeal.
- ★ Kettle heating elements easily replaceable in a matter of minutes.
- ★ Sturdy, lifetime welded steel construction.
- ★ Electric element keeps popped corn hot and fresh ready for serving.
- ★ Hinged Plexiglas doors can be pushed back out of the way against sides of popper case.

CRETORS *Caliente* WARMER

Here's the finest popcorn warmer-merchandiser made! Designed for operations where live popping is not possible at point-of-sale, or where there is a need for secondary merchandising locations supplied from a live popper or central popping plant. The CRETORS "Caliente" incorporates *two* 3-cubic-foot Elevator Wells, each with a capacity for the equivalent of 100 boxes of popped corn. And it features an exclusive heating system especially engineered after years of research to keep the popped corn hot, fresh, *crisp* regardless of atmospheric moisture conditions, and tasty. Thermostatically-controlled, filtered, heated air is forced through the popped corn to keep it at just the right temperature for maximum flavor retention and freshness. Sleek, streamlined appearance, curving glass, and over-the-counter service. Cabinet is finished in gleaming enamel, trimmed in stainless steel and chrome. All-metal construction.

**new "Flavor-Zone" heating system
keeps popped corn hot, fresh, crisp,
and tasty indefinitely in this
handsome warmer built by
the world's pioneer popcorn
machine manufacturer.**

BASIC SPECIFICATIONS: Dimensions: 39" wide x 24½" front to back x 46¾" to top of serving counter. Counter itself is 28¼" long x 8¼" wide. Heat for forced-air heating system is supplied by two 650-watt radiant heating elements. Dual powerful squirrel-cage blowers. Smooth-operating, self-locking elevator mechanism. Shipping weight: 293 lbs.

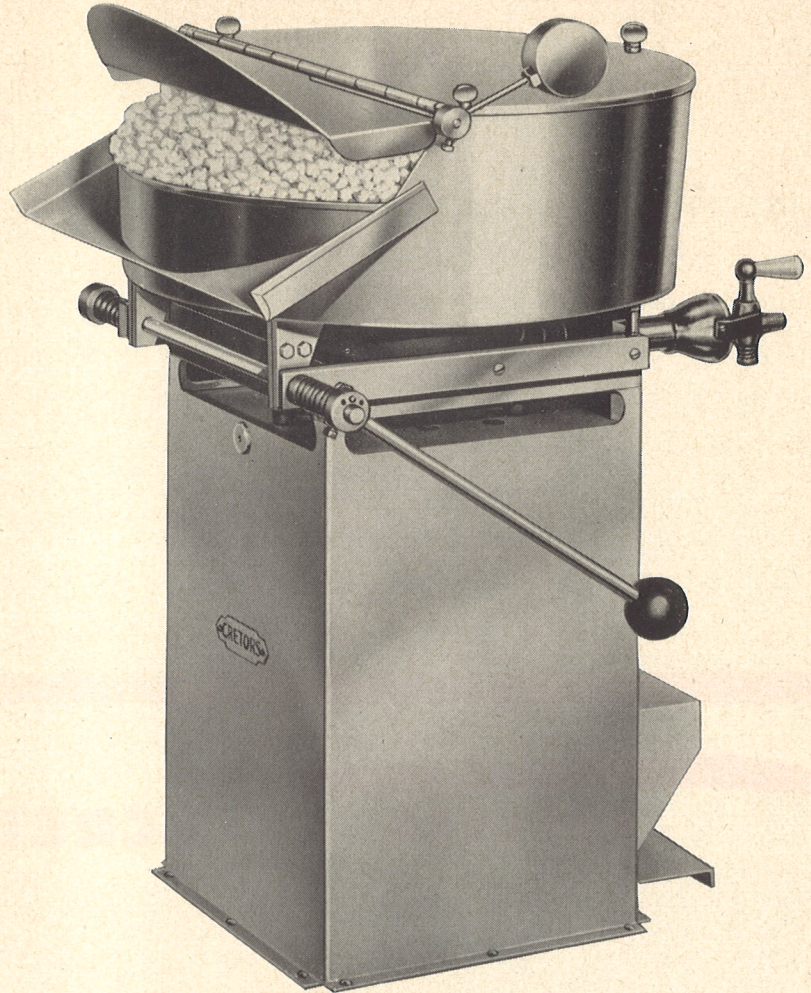

CATALOG NO. CW2E

Rear View (LEFT)

Operating cranks for two elevator wells, waste corn drawers, heat control switch, and air intake for heating system are visible in this rear view of the "Caliente." Note neatness of finish.

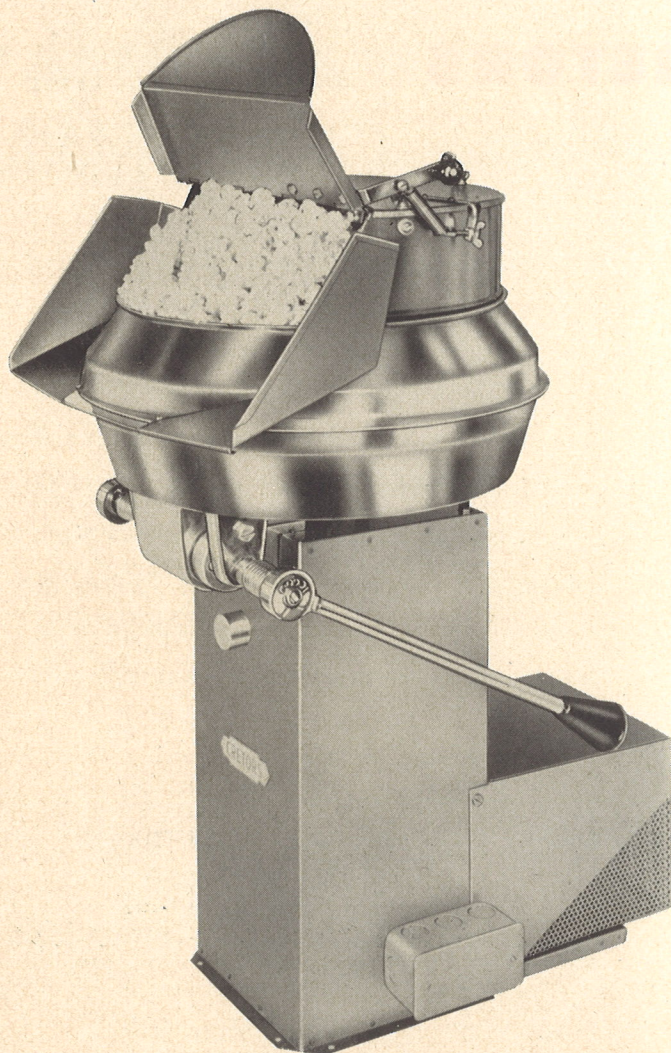

CRETORS POPPING UNITS

Mammoth-capacity gas or electric popping units for maximum production and profits. Ideal for popping plant production lines, trailer installations, central popping plants, auxiliary popping plants, and the like. CRETORS Giant Popping Units pop up to 32 oz. (2 lbs.) of raw corn per charge, giving them an hourly earning power up to \$75.00. Extra-heavy-gauge popping pan bottom, lighter-gauge walls concentrate the heat *under* the corn for greatest efficiency and popping volume. Counter-weighted lid lifts automatically at first pressure of popping corn. Dump handle interchangeable for right- or left-hand operation.

BASIC SPECIFICATIONS, GIANT GAS MODEL (ABOVE): Overall height to top of pan: 26". Stainless steel base measures 11¼" x 17½". Capacity: 2 lbs. of raw corn per popping, \$75.00 per hour. 110V. 60-cycle agitator motor. Enclosed transmission. Burns Natural, Manufactured, or Bottle Gas (specify which when ordering). Gasoline equipment optional at extra cost. Shipping weight: 85 lbs.

CATALOG NO. G32G

BASIC SPECIFICATIONS, GIANT ELECTRIC MODEL (LEFT): Overall height to top of pan: 27". Stainless steel base measures 8" x 15½". Capacity: 18 oz. of raw corn per charge, \$50.00 per hour. 110V AC. No. 10 or larger wire recommended with direct feed. Power is transmitted to kettle heating elements through commutator. No flexing cable. Fully automatic thermostatic heat control. Total wattage: 2,700. Shipping weight: 82 lbs.

CATALOG NO. G18E

GIANT ELECTRIC POPPING UNIT IS ALSO AVAILABLE WITH 32-OZ. CAPACITY KETTLE.

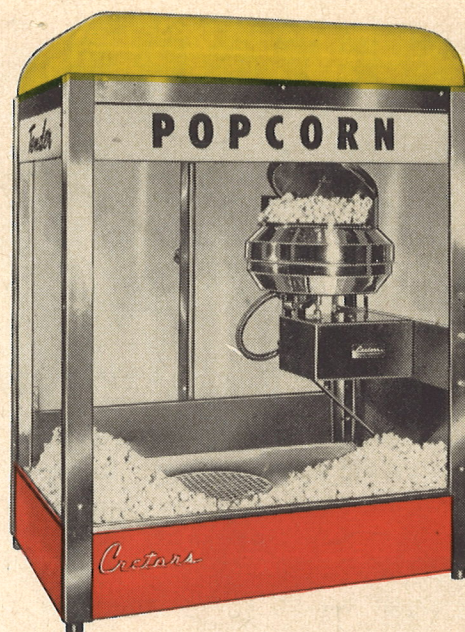

BASIC SPECIFICATIONS: 27" high to top of pan; stainless steel base measures 8" x 15½". 110-220 volts, 3-wire service. Total wattage: 4,700. Shipping weight: 86 lbs.

CATALOG NO. G32E.

CRETORS "HOLIDAY"

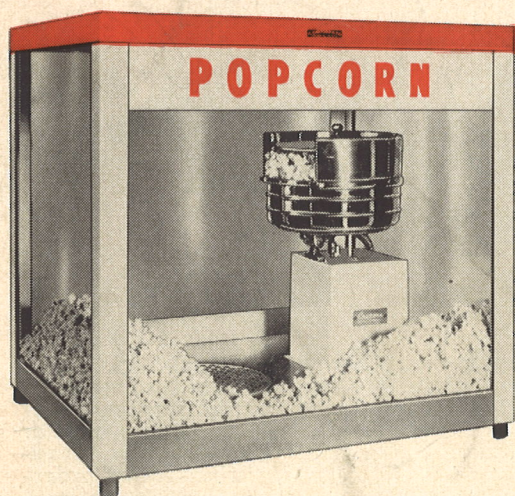

Counter Model

Identical to "Holiday" Floor Model, except does not have lower part of cabinet. Equipped with the same all-steel 12-oz. electric kettle, thermostatically-controlled. All-metal frame. Stainless steel popper case bottom uniformly heated by electric element to keep popped corn hot and appetizingly fresh. Polished aluminum waste corn separator. Cash drawer. Silk-screen "POPCORN" sign on front. Very popular because of its high earning power and easy "movability." Ideal in locations where lack of floor space prevents use of the "Holiday" Floor Model.

BASIC SPECIFICATIONS: Dimensions: 42" high x 30" wide x 20" front to back. 110V AC. Total wattage: 1,750. Shipping weight: 180 lbs.

CATALOG NO. CH12E

BASIC SPECIFICATIONS: Dimensions: 25½" high x 27" wide x 21" front to back. 110V. No special wiring required. Plugs into any ordinary AC outlet. Total wattage: 1100. Shipping weight: 99 lbs.

CATALOG NO. A6T

CRETORS "AMERICA"

Counter Model

A compact, colorful, high-quality CRETORS counter model that will enable you to get in the popcorn business at the lowest possible cost. All-steel electric kettle, thermostatically-controlled, pops 6 oz. of raw corn per charge and can turn out \$12.00 worth of popped corn per hour. Automatic-lift kettle cover for greater animation and sales appeal. All-metal frame finished in white enamel with bright red top and blue silk-screen "POPCORN" sign. Perforated waste corn separator. Stainless steel popper case electrically lighted. Electric element under case to keep corn hot and fresh. Enameled metal door, or optional Plexiglass doors with magnetic catches at small extra cost.

IMPORTANT DEALER BULLETIN
August 31, 1956

RE: PRICE CHANGES
EFFECTIVE SEPTEMBER 15, 1956
F.O.B. CHICAGO FACTORY

The substantial increases recently in steel prices makes it necessary that a part of this additional cost be passed on, and on September 15, 1956, the following prices become effective:

| | <u>NEW PRICE</u> |
|---|------------------|
| G32G - Giant 32-oz. Gas - stainless steel base | \$325.00 |
| G18E - Giant 18-oz. Electric - stainless steel base | 400.00 |
| G32E - Giant 32-oz. Electric - stainless steel base | 475.00 |
| A6T - America with Plexiglass doors | 275.00 |
| G32GT - Giant Gas equipped with thermostat | 375.00 |
| G32GG - Giant Gas with gasoline burner and tank | 370.00 |
| G18El3 - Giant 18-oz. Electric Popping Plant | 515.00 |
| G32El3 - Giant 32-oz. Electric Popping Plant | 590.00 |
| G32Gl3 - Giant 32-oz. Gas Popping Plant | 440.00 |
| G18El2 - Giant 18-oz. Twin Electric Popping Plant | 925.00 |
| G32El2 - Giant 32-oz. Twin Electric Popping Plant | 1075.00 |
| G32Gl2 - Giant 32-oz. Twin Gas Popping Plant | 775.00 |

As soon as our present inventory is depleted, the America will be available only with plexiglass doors as this seems more practical and eliminates any local problems with health officials. The Giant Gas Special (GS32G) and Giant Electric Special (GS18E) will be discontinued.

Cretors also has some improvements underway on several models and when these are completed, new price lists and brochures will be sent you. In the meantime, Please correct your May 1, 1955 price lists on the models mentioned.
