Volume production and maximum profits for busy plants are assured by fast and efficient operation with any one of Cretors' Giant Special Popping Plants. Constructed of durable welded angle iron, GS32EP has a stainless steel pan 57" long, 30" wide and 8" deep, is equipped with the Simplex 7600 Automatic Seasoning Pump and a receiving tray with chute for easy filling of containers. These features and many more make Cretors your finest source for central popping equipment. This plant is also available with 20-oz. electric kettle, and 32-oz. gas operated plant with safety pilot.

The Investment is Small the Profit is Big! 83% Profit Plus.

No other school business offers such a big return for such a small investment.

Easy to pop—easy to sell—tasty, crisp popcorn. America's most popular snack item. Schools all over the country are making BIG MONEY with popcorn—and at the same time, giving students valuable business experience.

Popcorn is not only high in profit . . . it is high in energy units, minerals and other essentials of a well rounded diet. It supplies roughage and is recommended by many dentists for between-meal snacks.
