

The Popcorn Box Profiteer™

Selling Popcorn Has Never Been So Much Fun

Cretors® now combines the look of a classic popcorn box with its popular Profiteer Popper.

It's attention-getting, fun and creates added sales and added profits for you.

That's why we call it the The Popcorn Box Profiteer.

Red Stripes and the traditional "Popcorn" circle are permanently baked into the tempered safety glass of the Popcorn Box Profiteer. The top has a scalloped border and the welded stainless steel cabinet has a durable, clean white epoxy finish to complete the look.

The secret to perfect popcorn, batch after batch, is Cretors' exclusive automatic kettle return system allowing the operator to dump the finished popcorn, clean the kettle and return it to the starting position, *all automatically*. The nickel-plated all-steel kettle is easy to clean and resists scratching and pitting giving you a like new appearance at all times. Your fresh popped popcorn will be more appetizing than ever.

Other features include an indicator light (operating with the kettle's thermostat) and lift-off hinged plexiglass doors for easy cleaning. All controls are at eye level.

The stainless steel interior and lift-off drop shelf are engineered for durability and designed for ease of maintenance.

A thermostatically-controlled deck heater and dual lamps keep your popped corn hotter... fresher longer.

Options include an Automatic Oil Pump, white Formica Merchant Base or a two wheel wagon base.

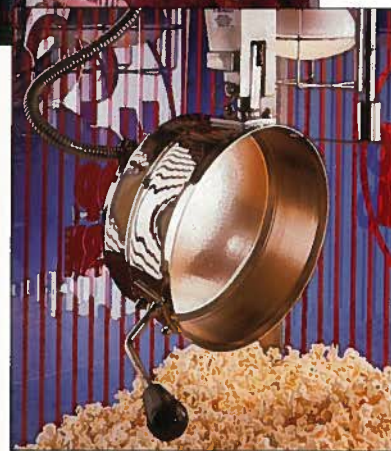

The Popcorn Box Profiteer combines the latest in technology for efficiency and economy with a whimsical touch. *Selling popcorn has never been so much fun!*

PT14C Popcorn Box Profiteer

**Two wheel wagon base

Cretors'

Bag In The Box Pump

Heats, Measures and Delivers Oil From The Box To Your Kettle Automatically

No more backbreaking pail changes! No spills and dangerous slippery floors! No waste! No more storage or disposal problems!

Use Cretors' Bag In The Box Pump with any liquid popping oil, including coconut oil, pre-packaged in a standard 35lb. box (15 1/2" x 11 1/2" x 8" H). A timer controls the heated oil--the perfect portion for perfect popcorn...batch after batch--for cost-efficient operation.

The Bag In The Box Pump operates with all new Cretors' poppers or retrofits any existing popper, factory-equipped with an automatic oil delivery system.

Holds two boxes, each on a heated shelf deck, so a "replacement box" is always ready without interruption or down time.

Bag In The Box Back Room Warmer

Melting and maintaining popping oil at the proper temperature takes time. The Bag In The Box Back Room Warmer stores and liquifies four standard-sized boxes on heated shelf decks to make sure you have the popping oil you need when you need it. Simply move your "all ready melted" popping oil from the warmer to your Bag In The Box Pump without interruption or down time. (Horizontal model also available)
