

Introducing The Presidents

State of The Art Technology in High-Volume Popping Equipment

The President model popcorn machine is manufactured in three distinct cabinet configurations: the Open Top President, the Enclosed President, and the Twin Enclosed President. Each model offers specific advantages to the operator based on location requirements for production, exhaust filtration and merchandising of the popped corn. All President models can be equipped with a 20, 32 or 48 oz. popper, and you can select either the 7700 pail pump or the new 7900 Bag In The Box Pump.

A twin Activated charcoal filter system is standard on the enclosed cabinet models, and all models are equipped with 1250 watts of heating power to keep the popped corn warm. This forced hot air system maintains the popped corn at just the right temperature to ensure freshness. Every "President" machine comes fully assembled and equipped with its operating tools.

Every Cretors® President provides state-of-the art technology for state-of-the art profitability in high volume popping.

The Twin Enclosed President features:

- 2 Nickel Plated, All-Steel 48, 32, or 20 oz. Kettles that are equipped for Automatic Oil pumps. *Note: Pumps sold separately; please specify 7700 or 7900 Pump.*
- 2 Activated Charcoal Filter Systems
- 2 160 CFM High Capacity Exhaust Blowers
- 1 Recessed Corn Bin with 1250 watt Comditioner system
- Tempered Safety Glass
- 2 Stainless Steel, Covered, 50 lb. capacity Raw Corn Bins
- 1 Reversible Backlit Popcorn Sign
- 2 Waste Corn Drawers
- 2 Accessory Kits
- Locking Casters for easy cleaning accessibility

ELECTRICAL: 120/208V or 120/240V, 60 Cycle, Single Phase, 8350 Watts, 38 Amps. Left Popper: 6800 Watts, 32 Amps.
DIMENSIONS: 28"Dx72"Wx73"T
 Crated 44"Dx80"Wx79"T
 Cube: 161 cu.ft.
NET WEIGHT: 645 lbs.

Optional Bulk Bag Filler Available

The air-driven bulk bag filler removes the popped corn from the recessed corn bin through the spout into a plastic bag.

There are profits in your future when you elect Cretors.[®] President Poppers

The Open Top President

Everything about the Open Top President suggests, "Wouldn't some fresh, hot popcorn taste good right now?" Designed to be up front where the action is, the Open Top President will work twice as hard for you. The aroma works first, enticing customers the second they walk in. Then, the sparkling glass cabinet--trimmed in an attractive new red popcorn sign--shows your customers an abundance of huge, fluffy kernels. And if anyone could resist that, the power of suggestion should do the trick. The sheer number of people lined up for popcorn will let everyone know just how good it tastes. And with an 80% profit margin, you'll be tasting success.

The Enclosed President

If you expect to be popping a high volume of corn, consider the Enclosed President--the tidy cousin of the Open Top. Its claim to fame is a two-stage oil and charcoal filter system with two 60 CFM exhaust fans. They remove the oil and smoke often created by high-volume popping. This exclusive feature, quite simply, makes the Cretors Enclosed President the most advanced high-volume popper available.

Open Top and Enclosed President Features:

- Tempered Safety Glass
- Stainless Steel Base
- Serving Shelf with space for the Topper Butter Dispenser (on Open Top)
- Recessed Storage Bin for storing popped corn
- Stainless Steel, Covered, 50lb. capacity Raw Corn Bin
