

Introducing The Steerable Antique

The Antique 4-Wheel Wagon Base has now been modified with a steerable front axle to produce the A4WB-Steerable. This new model is equipped with a steerable front axle, extra heavy-duty wheels and a pull bar (pictured). The wagon is painted with Cretors special two-part epoxy antique red and yellow. Special colors are available at additional cost.

The A4WB-Steerable will accommodate any of the Profiteer or Merchant poppers and can be equipped with a red and white stripe canopy. The A4WB-Steerable combines our modern popping technology with the nostalgic romance of our original 19th century poppers.

Model A4WB- Steerable (Part No. 91344)
